

# Investigation: Reduce, Reuse, Recycle

**Garbage . . . it's a dirty topic, but someone has to deal with it. Let the environmental education experts at Discovery Science Center do it for you!**

**NO COST, 45-minute assemblies** taught by the highly trained Science Center staff utilize a high-tech, student-response, keypad system to introduce your 5th grade students to CA Content Standards on mathematical reasoning and investigation and experimentation. Your students will journey through the process of understanding Southern California waste management issues, develop testable solutions for these issues, chart and graph related experimental data, and draw conclusions from the scientific evidence. In addition, they will be empowered and inspired to change their own behaviors and attitudes to make a positive personal difference.

**Following the assembly, each student receives a complimentary reusable book bag made of 100% recycled materials and a grade-specific educational booklet for use in the classroom and at home.**

**Book an assembly today! Call 714-913-5030. Hurry, availability is very limited!**

For more information or questions call (714)542-2823, ext. 5156.

2500 North Main Street, Santa Ana, CA 92705. Exit Main St. off 5 fwy.  
Monday - Saturday open 10 am to 5 pm, Sundays 11 am - 5 pm.
